

AHC31424 Certificate III in Conservation and Ecosystem Management (Pest Controller)

DESCRIPTION

This qualification provides the skills and theoretical and practical knowledge for work or further learning in the conservation and ecosystem management industry. The qualification provides for work roles encompassing a broad range of skills, or can be focused on one or more specialisations, including: Indigenous land management, Ecological restoration, Land, parks and wildlife management, Pest controller, Conservation earthworks, Marine, Fire and Mined land rehabilitation. Individuals with this qualification perform a range of conservation and ecosystem management activities including, site restoration, rehabilitation and renewal and management of the rural and natural landscapes, degraded sites and marine environments. They contribute to the preservation and maintenance of wildlife and their habitat in the natural ecosystem, parks and reserves. Activities frequently involve working with and preservation of indigenous culture and heritage resources.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

This course is an entry level Conservation and Ecosystem Management Qualification encompassing numerous hands-on industry specific, field orientated practical activities.

OVERVIEW

This course is delivered in a face-to-face workshop and industry field placement format incorporating knowledge-based theory assessment and field practical assessment activities conducted over a day depending on the knowledge skill and competency of participants.
